CEO and consultant in sports management.

SUMMARY

This article analyzes the administrative structure and corporate governance applied to the operational viability and expansion of high-performance sports complexes and swimming schools. The research examines the role of technical leadership in the development of qualified human capital and in customer retention strategies in the fitness services market. The study posits that the financial sustainability of these ventures depends on the convergence between excellence in the application of sports sciences and precision in controlling key market performance indicators. The results of the conceptual analysis indicate that segmenting services based on clinical criteria increases the perceived value of the service and provides predictive stability to cash flow. The work offers a structured management framework for physical education professionals transitioning to executive management positions.

Keywords: Sports Management; Corporate Governance; Competitive Strategy; Sports Complexes; Healthcare Services Management.

ABSTRACT

This article analyzes the administrative structure and corporate governance applied to the operational viability and expansion of high-performance sports complexes and swimming schools. The research examines the role of technical leadership in the development of qualified human capital and consumer retention strategies in the fitness services market. The study postulates that the financial sustainability of these enterprises depends on the convergence between excellence in the application of sports sciences and the precise control of key market performance indicators. The results of the conceptual analysis indicate that service segmentation based on clinical criteria increases the perceived value of the service and provides predictive stability to cash flow. The paper offers a structured managerial scope for physical education professionals transitioning to executive management roles.

Keywords: Sports Management; Corporate Governance; Competitive Strategy; Sports Complexes; Health Services Management.

1. INTRODUCTION

The global ecosystem of services focused on physical health, sports, and leisure has experienced

a significant structural transition in the last two decades of development
