Summary

This article investigates the role of corporate education, the development of emotional intelligence, and interpersonal training in strengthening behavioral competencies in public, private, and third-sector institutions. Based on a theoretical analysis of andragogy, social pedagogy, and organizational psychology, the study analyzes how the implementation of mentoring programs, ethical leadership, and continuous training increases team productivity, improves the institutional climate, and reduces conflicts in the workplace. The work also evaluates the importance of transferring proprietary educational methodologies in promoting the inclusion of vulnerable communities.

Keywords: Corporate education. Andragogy. Human development. Socio-emotional skills. Methodology transfer.

Abstract

This article investigates the role of corporate education, emotional intelligence development, and interpersonal training in strengthening behavioral competencies across public, private, and third-sector institutions. Grounded in the theoretical analysis of andragogy, social pedagogy, and organizational psychology, the study analyzes how the implementation of mentoring programs, ethical leadership, and continuous training enhances team productivity, improves institutional climate, and reduces workplace conflict. Furthermore, the paper evaluates the importance of transferring proprietary educational methodologies in fostering the inclusion of vulnerable communities.

Keywords: Corporate education. Andragogy. Human development. Socioemotional competencies. Methodology transfer.

Introduction

The development of human capital and the continuous promotion of learning in the work environment.

Corporate and community-based sustainability requirements have become central to the process.

The resilience of modern organizations. As conceptualized by Mezirow (1991), learning
