Public governance, health regulation and administrative law: an analysis of institutional efficiency and regulatory impact in state agencies.

Public governance, sanitary regulation, and administrative law: an analysis of institutional efficiency and regulatory impact in state agencies

Public governance, health regulation and administrative law: an analysis of institutional efficiency and regulatory impact on state agencies

Hosana Cecília Fagundes
holds a specialization in Sanitary Surveillance from the Oswaldo Cruz Foundation (FIOCRUZ/Brasília) and in Political Science from AEUDF, a Bachelor's degree in Law from the University Center of Brasília (UniCEUB), and a Bachelor's degree in Pedagogy from AEUDF.

Abstract: This article analyzes the mechanisms of public governance, state regulation, and the application of Administrative Law in regulatory agencies and bodies of the Executive Branch. Based on literature in public law, political science, and health regulation, the study investigates the effectiveness of Regulatory Impact Assessment (RIA) and the simplification of administrative processes for improving the provision of public services and protecting public health. The role of legal certainty, due administrative process, and the strengthening of institutional capacities as vectors for promoting socioeconomic development and state transparency is discussed.

Keywords: Administrative Law. Health regulation. Regulatory agencies. Public governance. Regulatory Impact Assessment.

Abstract: This article analyzes the mechanisms of public governance, state regulation, and Administrative Law enforcement within regulatory agencies and Executive Branch bodies. Grounded in public law literature, political science, and health regulation, the studies investigate the efficacy of Regulatory Impact Assessment (RIA) and administrative process streamlining in improving public service delivery and protecting collective health. It discusses the role of legal certainty, administrative due process, and the strengthening of institutional capacities as drivers for promoting socioeconomic development and state transparency.

Keywords: Administrative Law. Sanitary regulation. Regulatory agencies. Public governance. Regulatory Impact Assessment.

Introduction

The reconfiguration of the contemporary State and the bureaucratic insulation of technical functions.

These strategies resulted in the strengthening of the regulatory agency and oversight body model.

Chapter 1: Foundations of Administrative Law and the Principles of State Regulation

The actions of direct and indirect public administration are based on the strict compliance with the principle of Legality is the limit and guarantee of its institutional action. According to Meirelles (2018), while in In the private sector, it is permissible to do anything that the law does not prohibit; in public administration, the state agent... It can only act strictly under the command and within the limits established by positive law.

The fundamental principle is the guarantee for those subject to administrative action against arbitrary actions and abuse of power. conduct of regulatory bodies.

The proliferation of regulatory agencies at the end of the 20th century responded to the need to introduce Technical expertise, stability, and political neutrality in the management of strategic sectors and in the protection of diffuse rights. As analyzed by Marçal Justen Filho (2014), the normative power conferred on these Special autonomous entities do not replace the legislative function, but complement it through the issuing resolutions and technical regulations based on scientific evidence and analyses of risk, ensuring the rapid adaptation of standards to technological changes.

The instruction of the regulatory administrative process requires non-negotiable respect for the guarantees of The right to a fair hearing and full defense. The application of administrative penalties, such as fines, The closure of establishments or seizure of products must be preceded by proper notification. The ability to produce evidence and provide exhaustive justification for the decision. Lack of justification.

A technical error in the initial filing renders the administrative process null and void, resulting in the annulment of the act by the court. The Judiciary is causing financial damage to the State.

Furthermore, modern public governance requires the continued implementation of the principle of Efficiency, introduced into the constitutional order by Constitutional Amendment 19/1998. The search through expedited administrative processes, the elimination of unnecessary notarial requirements and the Active transparency in public actions reduces transaction costs for society and increases... The attractiveness of the country's business environment.

It is concluded that strict adherence to the principles of Administrative Law is the condition. indispensable for the legitimacy of state intervention. Action guided by legality and motivation. Efficiency provides predictability for those governed and strengthens the State's ability to fulfill its obligations. its constitutional functions of protecting and promoting social well-being.

Chapter 2: Sanitary Surveillance, Risk Assessment and the Protection of Public Health

Sanitary surveillance comprises a set of actions capable of eliminating, reducing, or preventing risks. to health and to intervene in health problems arising from the environment, production and circulation.
