#### **Summary**

Domestic violence constitutes a persistent social, cultural, and legal phenomenon that primarily affects women, children, the elderly, and people in vulnerable situations, reflecting structural inequalities and cultural patterns of domination and violence. It is not limited to physical aggression, also encompassing psychological, moral, patrimonial, and sexual forms, with serious consequences for the mental health, well-being, and family structure of the victims. Faced with this complex reality, the penal system is challenged to offer swift and effective responses, guaranteeing immediate protection for the victim and accountability for the aggressor, without compromising procedural guarantees. In this context, preventive detention emerges as the most impactful precautionary measure, being used to safeguard the physical and psychological integrity of the victim, prevent recidivism, and ensure the effectiveness of criminal prosecution. This article proposes a critical analysis of its application in cases of domestic violence, based on the Code of Criminal Procedure and Law No. 11.340/2006 (Maria da Penha Law), in addition to examining doctrines, jurisprudence, and empirical data that reveal both its importance and its risks of trivialization. Finally, it seeks to reflect on legal alternatives and public policies capable of balancing the protection of the victim and the fundamental rights of the accused.

Keywords: Pretrial detention; Domestic violence; Procedural guarantees; Criminal law; Victim protection.

### **Abstract**

Domestic violence constitutes a persistent social, cultural, and legal phenomenon that primarily affects women, children, the elderly, and people in vulnerable situations, reflecting structural inequalities and cultural patterns of domination and violence. It is not limited to physical aggression but also includes psychological, moral, patrimonial, and sexual forms, with serious consequences for the victims' mental health, well-being, and family structure. Given this complex reality, the criminal justice system is challenged to provide swift and effective responses, ensuring the victim's immediate protection and the offender's accountability without compromising procedural guarantees. In this context, preventive detention emerges as the most severe precautionary measure, used to safeguard the victim's physical and psychological integrity, prevent recidivism, and ensure the effectiveness of criminal prosecution. This article proposes a critical analysis of its application in cases of domestic violence, based on the Code of Criminal Procedure and Law No. 11.340/2006 (Maria da Penha Law), while also examining doctrines, jurisprudence, and empirical data that reveal both its importance and the risks of overuse. Finally, it seeks to reflect on legal alternatives and public policies capable of balancing victim protection with the fundamental rights of the accused.

**Keywords:** Preventive detention; Domestic violence; procedural guarantees; criminal law; Victim protection.

#### Introduction

Domestic violence is a deeply rooted structural phenomenon in

Brazilian society, disproportionately affecting women, children, the elderly, and individuals.

in a situation of social vulnerability. This situation reflects historical, cultural and inequalities.

economic factors that perpetuate patterns of oppression and discrimination, demonstrating that violence

Domestic life transcends the private sphere and is embedded in the broader context of power relations and
of gender. The problem, therefore, must be understood not only as an isolated act of
aggression, but as a manifestation of a system of domination that reproduces itself through practices.

Cultural factors, institutional omissions, and gaps in the implementation of public protection policies.

Data from the Brazilian Public Security Forum (2024) indicate that thousands of cases of

Domestic violence cases are reported annually in Brazil, with alarming rates of recidivism and

A growing number of femicides. This data demonstrates that confronting violence...

Domestic violence remains one of the greatest challenges for a democratic state governed by the rule of law, requiring...

coordinated and effective responses between public authorities, civil society, and the justice system

criminal. Domestic violence, therefore, is not merely an individual matter, but a

A social and legal phenomenon of a systemic nature, which demands multidimensional action —

preventive, repressive and assistance-based.

In the legal field, Brazil has a relevant regulatory framework aimed at protection.

of the victims, with particular emphasis on the Maria da Penha Law (Law No. 11.340/2006), considered a landmark. in the fight against domestic and family violence against women. This legislation establishes measures protective measures of urgency define assistance mechanisms and impose on the State the duty to prevent and punish and to eradicate violence. Additionally, the Code of Criminal Procedure (Decree-Law No.

Law 3.689/1941 provides for preventive detention as an exceptional precautionary measure, the purpose of which is to guarantee public order, criminal investigation and the application of criminal law, and can also be used for to safeguard the physical and psychological integrity of the victim.

In this context, pretrial detention plays a prominent role in combating violence.

domestic violence aims to prevent repeat offenses and ensure the effectiveness of criminal prosecution.

However, its application raises relevant debates about the balance between protecting the victim and the preservation of the defendant's constitutional guarantees, especially the principle of presumption of innocence. innocence and the right to liberty. ### Proposals for legal reforms:

It is necessary to improve the legislation to establish objective and clear criteria for the Decreeing preventive detention in cases of domestic violence, including risk parameters, Recidivism, severity of the aggression, and possibilities of alternative measures. Legal reforms may Standardize best practices, reduce arbitrariness, and increase the predictability of judicial decisions. strengthening the protection of the victim and ensuring the proportionality and exceptionality of the measure.

The adoption of these public policies and recommendations not only increases the effectiveness of The justice system plays a role in protecting victims of domestic violence, but it also contributes to a A more ethical, balanced, and sustainable approach that respects the fundamental rights of the accused. while offering comprehensive protection to the victim.

### 10. Conclusion

Pretrial detention plays an essential role in addressing domestic violence.

especially in situations where there is a concrete risk to the physical or psychological integrity of the victim, recidivism by the offender or a threat to the criminal investigation. However, its application should always be guided by caution, respecting the fundamental rights of the accused, such as the presumption of innocence, Due process and proportionality of the measure. Empirical experience and analysis.

Doctrinal evidence indicates that the careful decreeing of preventive detention, when duly justified, Individualized and exceptional, it is effective in preventing new episodes of violence and protecting the victim. and to ensure the effectiveness of the penal system.

At the same time, the integration of alternative measures, such as distancing from home, restriction contact, electronic monitoring and periodic judicial follow-up, combined with programs

Providing psychological, social, and multidisciplinary support, it represents a balanced approach capable of To guarantee the victim's safety without compromising the procedural rights of the accused. The application

A combination of preventive and precautionary strategies strengthens the justice system and promotes reintegration.

Social rehabilitation of the offender reduces recidivism and contributes to a safer and more protected social environment.

Furthermore, effective public policies and legislative reforms are fundamental to

to consolidate a more proportionate, secure, and just penal system. The adoption of objective criteria for

the decreeing of preventive detention, the continuous training of magistrates, prosecutors and defense attorneys, and

The coordination between judicial bodies, social services, and health services constitutes an indispensable element.

for the construction of a victim protection model that is effective, humane, and legally sound.

In summary, the judicious application of pretrial detention, combined with alternative measures and policies.

Integrated, it represents a necessary balance between immediate protection of the victim and respect for

procedural guarantees for the accused, being an indispensable tool for confronting the

Domestic violence in an ethical, proportionate, and effective manner.
